

New Jersey Climate Change What's Happening and What Can We Do?

Saturday, April 13 at 2:00

Dr. James Shope will address a wide range of climate change impacts and adaptation strategies in NJ. He will present the latest climate change information and how extreme weather may change in the future. We will also discuss how we can contribute to climate resiliency in our own communities.

Dr Shope is an assistant extension specialist in climate services with the NJ Agricultural Experiment Station and the Dept. of Environmental Sciences at Rutgers University.

Sign up in the library or call 908-439-3761 to reserve your seat.

Climate friendly refreshments served.
